What is the Vulnerability Index?

The Vulnerability Index is administered in the form of a survey, which captures a homeless individual's health and housing status. It identifies the most vulnerable through a ranking system, which take into account risk factors and the duration of homelessness. This ranking allows those with the most severe health risks to be identified and prioritized for housing and other support.

*Please note: Participation in the survey is not a guarantee or promise of forthcoming housing or support. For more information visit: www.180santacruz.org
